AMARYLLIS

---

---

## GERMAIN SEED CO.

326-330 S. Main St., Los Angeles, Cal.

## Notice to Correspondents.

We decline sending perishable goods, as Bulbs or Plants, C.O.D., unless a remittance of 50 per cent accompanies the order to insure us against loss. Orders from unknown correspondents must be accompanied with cash or satisfactory reference. All bulbs forwarded at purchaser's expense. If to be sent by mail an extra amount must be sent to cover postage, which varies according to the variety of bulbs; where no amount is quoted for postage, those varieties will be sent free by mail.

## Germain's Special Collections of Bulbs.

These are made up of the same choice bulbs as offered in this catalogue, but as we offer them at greatly reduced prices, we cannot allow any alterations.

# Dutch, California and other Bulbs.

## FALL AND SPRING PLANTING.

### Hyacinths.

For certainty and regularity of bloom, Hyacinths are unsurpassed by any other flowers. The simplicity of their culture and the invariable return for the little labor required to grow them, make them general favorites.—Plant in open ground, in good rich soil, from November to January, covering to the depth of from 3 to 4 inches. For pot culture, plant in 5-inch pots, leaving one-third of the bulb exposed. Keep in a cool dark place for 5 or 6 weeks till the roots are fully developed, then gradually inure to the light. In glasses, fill the glass with water, so as to nearly touch the base of the bulb. A piece of charcoal the size of a walnut, put into the water, will keep it pure and obviate frequent changing. In changing the water, draw the roots lightly through the hand, to clean them from any scum, which might, if left, induce rot.

SINGLE HYACINTH

### Mixed Single Hyacinths.

Postage 20c per doz. extra

| Single Blue, selected bulbs.....       | 5     | 50       | 3 50    |

## Tulips.

Tulips may be planted in the open border from October to February, in well-drained, deeply worked beds. Cover to the depth of 4 inches, and keep free from weeds until the plants appear. They also succeed well in pots, which should be plunged to the depth of 3 inches for the first two months till the roots are developed, when they should be brought to the light.

### Early Single Tulips.

## Late Single Tulips.

Postage 5c per doz. extra.

**Byblooms**, superfine mixed, white ground, blotched and feathered, with crimson, pink, violet and maroon. Each 5c; per doz. 30c; per 100 \$2.00.

**Parrot or Dragon**, large flowers of brilliant and varied colors, petals curiously cut or fringed; very showy and attractive for beds. Each 5c; per doz. 30c; per 100 \$2.00.

## Narcissus.

The Narcissus is one of the most useful of the early blooming bulbs, being hardy and of easy culture. Plant in any good garden soil, any time from November to the end of January, covering to the depth of about 5 inches. The Polyanthus varieties may also be grown in pots or water. The varieties of Narcissus are deserving of far more attention than they have hitherto received in this section; their variety of color—varying from pure white to bright orange—delicious fragrance, easy culture and free blooming qualities, render them especially desirable for garden, while for cut flowers they will be found invaluable.

## Polianthus Narcissus.

Postage 20c per doz. extra.

## Crocus.

The Crocus is among our earliest spring flowering bulbs, and makes a splendid show when grown in masses. They may be planted any time in the fall, in good garden soil, about 3 inches deep and 3 or 4 inches apart; they may also be grown in pots or glasses, sometimes grown in ornamental pots shaped like a hedgehog, when the bulbs are inserted in small holes about 1 inch apart. When in bloom, they are very effective for house decoration.

**Ranunculus.**

Should be planted in rich, well-drained, sandy soil. If the soil is heavy prepare it by mixing in plenty of sand and well-rotted manure to the depth of 6 or 7 inches, or by making a small trench 4 or 5 inches deep, filling this up with sand, in which plant the bulbs about 3 inches deep, being careful to press the sand firm around them. *Ranunculus* are strikingly beautiful flowers, of every imaginable shade from bright vermilion to pink, yellow and pure white. They are free bloomers, very double, and useful for cut flowers. Will be found to amply repay for a little extra care in cultivation, and are worthy of everyone's attention.

FRENCH RANUNCULUS.

**Iris.**

Postage 5c per doz. extra; Kaempferi 10c each extra.

A beautiful class of flowering plants, with flowers of sweet perfumes and quaint forms, almost equalling orchids in beauty, richness and variety of color; very useful for bouquets and vases, lasting a long time when cut. Plant in rich light soil, about 3 inches deep. Often planted in clumps when they are particularly effective; for this purpose set the bulbs about 3 inches apart each way; every three of four years they should be dug up and reset.

|                                                                                                                                                                                       | Each. | Per Doz. |

| Second size ..... | 10 | 75     |
| Third size .....  | 5  | 50     |

**Spotted**, (*Richardia alba maculata*) has spotted leaves, very ornamental; flowers white with purplish brown throat..... 15 1 50

**Arum Sanctum**, (Black Calla) coal black, very striking.... 25

**Arum Cornutum** (Monarch of the East) A highly remarkable, beautiful, bulbous flower attracting immediate attention. The only treatment required is to simply place the large, flat, round bulb on a table or shelf in a warm room or greenhouse, very soon the bulb begins to show a head and within a few weeks (sometimes after 8 or 10 days) according to season and temperature, a curiously formed flower 16 or 18 inches long develops. The flowers which are spotted dark red on a yellowish orange-red ground are entirely different from any other as to coloring and shape.

After flowering, this bulb should be planted in the open ground where it then throws up elegant, dark green, wide expanded foliage which itself forms a fine subject in the garden, particularly when planted in May in a moist and sheltered place.

## Calochortus.

"The Mariposa Lily," or "Butterfly Tulip." (See cut page 7.)

These are among the most beautiful of our native California plants. The flowers resemble a tulip in form, and are of the most varied and showy colors. May be planted in good soil, covering about 3 inches deep, any time from August to November, but early planting is considered best. For eastern culture, as a pot plant, they will be found especially useful.

## Calochortus.---Continued.

CALOCHORTUS.

## Oxalis.

Graceful little plants, with dainty foliage and flowers of various colors, suitable for hanging baskets, pots, window boxes, small beds, etc. For pot culture, plant from 6 to 8 in a 5 or 6 inch pot, and cover about 1 inch deep. For beds, plant 4 or 5 inches apart and 1 to 2 inches deep in rich friable soil.

LILIAM HARRISII.

**Lilies.**

Postage 20c to 25c per doz. extra.

We cannot say too much in praise of this elegant class of plants which are becoming more popular every season. The Lily has been rightly termed the "Queen of Flowers," and no flower can convey a more true idea of purity, grandeur and stately beauty. Very handsome either for garden or pot culture, deliciously fragrant and fine for cut flowers.

Culture in open ground; dig well, add some sand and well-rotted manure (except for Auratum, which will not bear manure) and plant about five inches deep. Culture in pots; give thorough drainage, then fill up with compost, consisting of good, rich soil, peat and river sand; place the bulb firmly on this and cover them about one inch below the surface; give no water until the plants appear above ground, then water freely.

L. Candidum and L. Harrisii ready Sept. 1, other varieties about the middle of November.

Each. Per Doz

**Freesia.**

This elegant little flower seems to be especially adapted to the climate of California, and is becoming more popular each season. They succeed best in light soil, and may be planted from August to November, from 2 to 3 inches deep, the flowers, which appear in February and March, are white, fragrant, and very useful for cut flowers, often lasting two weeks if cut as soon as open.

DOUBLE PEARL TUBEROSE.

Plant in spring, covering the bulb so that the soil. (see cover).

**Freesia refracta alba**, pure white, very handsome, possessing a peculiar grace of form and delightful fragrance, one pot of 5 or 6 bulbs being sufficient to perfume a whole house. Per doz. 10c; 100 70c.

## Tuberose.

Postage 20c per doz. extra. Supplied from January to June.

"Polyanthus Tuberose," one of the most beautiful summer and fall flowering bulbs in cultivation. Flowers pure white and of exquisite fragrance. Admirably adapted for cut flowers, and of easy cultivation. Plant in open ground, when the soil has become warm. May also be started indoors in pots, earlier, and afterwards planted to where they are to flower. Hardy in Southern California.

**Double Pearl**, (see cut) far superior to the old double variety, growing only about 2 feet high, with large individual double white florets, which have longer foot stalks than the old variety, rendering them more useful for cut flower purposes. Large bulbs, each 5c; per doz. 30c; per 100 \$2.00.

## Miscellaneous Bulbs.

**Agapanthus umbellatus**, "African Lily," beautiful porcelain blue, of easy culture. Each 25c—50c.

Postage 10c to 15c each extra.

**Amaryllis**, a beautiful class of plants of the easiest possible culture. May be grown in the open border or in pots neck will be even with the surface of the
